

# Allianz Invest Konservativ

## Monatsbericht der Allianz Invest KAG mbH

30.04.2012

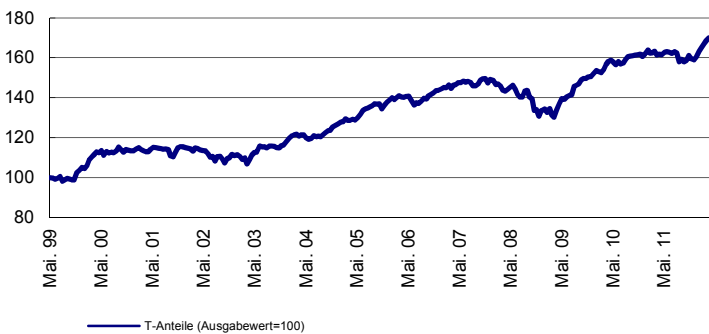

### Investment Objective

This fund of funds is investing in national and international funds of Allianz Group International, thus diversifying 25% into equity funds. This diversification enables the fund to gradually build up the asset base by simultaneously observing conservative investment strategies. Furthermore the fund is valid for coverage of deferred compensation for pension purposes according to § 14 EStG.

### Annual Performance (%)<sup>2,3</sup>

### SRRI

This risk and reward indicator is based on past performance data and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile of the fund. The categorisation of the fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

### Investment Class 2 (conservative)

Capital preservation is important for you, but to gain a higher yield you are willing to accept the risk of losses. Short-term fluctuations in value cannot be ruled out. The concentration on investments with high credit ratings limits the risk of great losses. On the other hand, the capital gains potential in this segment is limited. Performance is expected above money market investments. Recommended investment period: at least 3 years.

Front-end load will be charged at the acquisition of the fund units. Any front-end loads reduce the capital employed and the performance. Past performance is no guarantee of future results. Performance-Calculation according to method as defined by OeKB. Individual performance will vary. The sales prospectus and business reports in german language can be obtained free of charge from Allianz Investmentbank AG and Allianz Invest Kapitalanlagegesellschaft mbH, both Hietzinger Kai 101-105, A-1130 Wien. This publication constitutes advertising. 1. Performance calculated at the net asset value, excl. front-end load. 2. The illustration is based on the accumulated performance of the stated periods excluding front-end load. 3. Front-end load is only calculated at date of investment. E.g.: Investment-amount of EUR 1000,- will be reduced by front-end load of 3% (EUR 29,12). Within custody the investor has to be aware of annual depository costs which will lower the performance of the investment.
